36 - STRONG POINTS -- THE COURSE	
Thomas Lebesmuehlbacher	
Response Rate	7/10 (70%)
<ul style="list-style-type: none"> • Having the assignments work as part of the final paper is incredibly helpful. • As a capstone class it was very helpful to have assignments that were parts of the research paper • Interesting subject/topics with relevant applications/lectures • followed the syllabus and plans to a T. Really focused on perfecting our capstones. Heavy focus on the analytical and the empirical nature of econ. • Gives a good idea of how econ papers should be written • The course is very informational on several macroeconomic variables and how they interact with developing countries, providing a wider context for my insight in the global economy. • Lot of new ideas and concepts 	

Xavier University

Fall 2018 Course Evaluations

Course: 201809-ECON-441-01-TR--A: ECON-441-01 Econ of Developing Country II-201809-ECON-441-01-TR--A
Instructor: Thomas Lebesmuehlbacher *
Response Rate: 8/10 (80.00 %)

37 - STRONG POINTS -- THE INSTRUCTOR

Thomas Lebesmuehlbacher

Response Rate	8/10 (80%)
----------------------	------------

- Very knowledgeable, always available to help.
- Willing to work with you a lot out of class on capstone
- good organization of subject matter into units tries to keep topics interesting when he can
- Extremely knowledgeable about the course and economics overall. Very helpful outside of the class and shows interest/help if you put forth the effort. Wants students to succeed but understands that requires a high level of effort and execution.
- Really cares. Willing to work with students. Encourages critiques and discussion. Works with students
- Always willing to help students
- Dr. Lebesmuehlbacher is a very disciplined teacher with very straightforward lesson plans, he was fairly accessible to students whenever they needed help.
- One of the best instructors: fun, energetic, cares.

38 - WEAK POINTS -- THE COURSE

Thomas Lebesmuehlbacher

Response Rate	7/10 (70%)
----------------------	------------

- The in class stata exercises are overwhelming and it can be difficult to learn the coding for stata while trying to keep up.
- N/A
- Stata throughout the semester was challenging and confusing at times. Could be applied differently to be more effective because I definitely see the benefits of learning this software.
- STATA. Still don't feel comfortable with it and I can't believe we weren't prepped for its use as a prereq. Not fair to us or to Thomas.
- There was no prerequisite to stata to get into this course
- Some subjects were discussed more indepth than the others, might be worth restructuring and cutting down the number of topics covered.
- Some readings were longer, the table discussions in class get a little boring.

39 - WEAK POINTS -- THE INSTRUCTOR

Thomas Lebesmuehlbacher

Response Rate	7/10 (70%)
----------------------	------------

- Was not always clear on the grading criteria for the assignments.
- N/A
- The course was overall a lot of work but I felt motivated/rewarded for the work that I put in. Besides stata, I thought the class/professor were great!
- moves too fast through theoretical math
- Goes a little too quickly through each paper. Unaware when students are confused
- None
- n/a

40 - SUGGESTED IMPROVEMENTS -- THE COURSE

Thomas Lebesmuehlbacher

Response Rate	7/10 (70%)
----------------------	------------

- Use in class stata excercises for smaller portions - instead of recreating multiple graphs, focus on creating one, so we can pay more attention to the actual coding.
- N/A
- Incorporate stata differently
- Stata 1 credit online class like info 120 as a prereq!
- Have a prerequisite for learning stata.
- Besides the STATA comments we made in the middle of the semester it might help class discussions to "assign" the questions we will be discussing ahead of time so that they move more fluidly.
- More open discussion about ideas and implications instead of just reading from the paper

Response Rate: 8/10 (80.00 %)

41 - SUGGESTED IMPROVEMENTS -- THE INSTRUCTOR

Thomas Lebesmuehlbacher

Response Rate 7/10 (70%)

- More clarity on what they're looking for in a given assignment.
- N/A
- more detailed step-by-step instructions on first Stata assignments. provide a few examples in beginning
- No complaints
- slow down with math theory to explain more. step by step
- Stata is not something that is easily learned at home if you want to use it, stata should be very well taught
- n/a
